Founder & CEO

About Lino.AI

We are working seamlessly to offer AI solutions to everyone in society by providing real-world, practical solutions. We teach students and professionals how AI works through hands-on projects and multiple AI agents, and help organizations integrate chatbots for instant, reliable support.

We specialize in integrating agentic chatbots on websites and portals for instant responses and direct inquiries, ensuring there is no delay in conversation flow. In institutions, we integrate chatbots on portals so students, employees, and anyone inquiring can get feedback as fast as possible. We also create modern, responsive websites for individuals, businesses, and institutions.

Looking ahead, **Lino.AI** is committed to scaling into a comprehensive AI technology company that supports and empowers all sectors—education, healthcare, finance, and legal, among others. Our mission is to provide accessible, free, and reliable AI-driven research and support, making information retrieval seamless and transparent. We strive to bridge knowledge gaps and foster innovation, ensuring that individuals and organizations in every field can benefit from the transformative power of artificial intelligence.

Our vision is to empower the world with AI autonomy and practical knowledge for a better future.

Our Services

Agentic Chatbot Integration

We integrate agentic chatbots on websites and portals for instant responses and direct inquiries, ensuring seamless conversation flow.

Custom Chatbots

Custom AI chatbots for support, inquiries, and automation for businesses and institutions.
